

Message from the Head

As Head of the Department, I am pleased to report successful MS orientation for the January–June 2026 session, welcoming new guidance on research planning. We also welcomed new faculty and staff members and celebrated the successful MS thesis defenses, reflecting our commitment to academic excellence, research integrity, and departmental growth.

[Prof. Dr. Amir Hossan Shaikat](#)

MS orientation January June 2026

The Department of Physiology, Biochemistry and Pharmacology organized an orientation program for MS students of the January–June 2026 session. The program aimed to guide newly enrolled students regarding academic expectations, research planning, and successful completion of their postgraduate studies.

During the session, MS student Abdullah Al Mamun shared his valuable experience on effective time management and presented a practical roadmap for completing an MS thesis within the stipulated timeframe. He emphasized the importance of early research planning, regular communication with supervisors, maintaining a structured study schedule, and balancing coursework with thesis work. His motivational talk encouraged the new students to stay focused, disciplined, and proactive throughout their academic journey.

The program was presided over by Prof. Amir Hossan Shaikat, who highlighted the significance of

dedication, research integrity, and consistent effort in achieving academic excellence. He advised students to utilize departmental resources effectively and maintain a collaborative relationship with faculty members to ensure timely completion of their degrees.

The orientation program concluded with an interactive discussion session, where students exchanged ideas and clarified their queries regarding research activities and academic requirements.

The Department of Physiology, Biochemistry and Pharmacology, CVASU is delighted to extend a warm welcome to Dr. Mohammed Ashif Intiaz Shawn, who has recently completed his PhD from Tohoku University, Japan, and joined the department as an Associate Professor.

We are equally pleased to welcome Mr. S. M. Sakib Uddin as our newly appointed Office Assistant cum Computer Typist.

We wish both of them great success and a rewarding journey ahead with the department. Looking forward to their valuable contributions in strengthening our academic and administrative excellence.

The Department of Physiology, Biochemistry and Pharmacology at Chattogram Veterinary and Animal Sciences University (CVASU) is pleased to announce the successful completion of MS thesis defense examinations in Pharmacology held today.

Two postgraduate researchers presented and defended their research work:

◆ Dr. Khadija Begum

Thesis Title: “Modulation of hydrogen peroxide induced oxidative stress using a bilimbi leaf extract in Swiss albino mice”

◆ Dr. Arfanul Saif

Thesis Title: “Ameliorating effects of *Psidium guajava* leaf extract and *Annona squamosa* leaf extract on lead induced hepatotoxicity in Swiss albino mice”

Both studies contribute significantly to the understanding of natural plant-based interventions in oxidative stress and toxicological conditions, highlighting promising avenues for future pharmacological research.

The department extends its sincere congratulations to both candidates for their successful defense and wishes them continued success in their academic and professional endeavors.
